

Town of Charlestown  
Water Main Flushing

Monday April 18 through Wednesday April 20, 2016

Twice a year the Town of Charlestown flushes the water mains at a high flow rate to remove any impurities that may build up over time. This procedure may cause discoloration or riley water which will clear up fairly quickly, the water is safe to use and the system will be cleaner when we are complete.

Charlestown will be done on the 18<sup>th</sup> and 19<sup>th</sup>  
North Charlestown on the 20<sup>th</sup>

Thank you,  
Charlestown Water Department
